# **TYPE I ROTATOR CUFF REPAIR PROTOCOL**

(arthroscopic tears for small to large tears with good tendon quality >1cm, <5cm)

# Jeffrey E. Otte, MD

# PATIENT

DATE OF SURGERY

#### GOALS

1 Maintain integrity of repair. Never overstress healing tissue

- 2 Reestablish full PROM as quickly and safely as possible
- 3 Reestablish dynamic humeral head control
- 4 Improve external rotation muscular strength and muscular balance
- 5 Initiate resisted shoulder abd and flex when muscular balance is restored
- 6 Caution against overaggressive activities (tissue healing constraints)
- 7 Restore patient's functional use of the shoulder, but do so gradually
- 8 Active rotator cuff muscles through inhibition of pain

## PHASE I: IMMEDIATE POST SURGICAL PHASE DAY 1-10

		PHASE I: IMMEDIATE POST		
GOALS:	Maintain ir	ntegrity of repair PR	ECAUTIONS:	Maintain arm in brace, remove for exercise
	Gradually	increase PROM		No lifting with involved arm
	Diminish p	ain and inflammation		No excessive shoulder extension
	Prevent m	uscular inhibition		No aggressive stretching or sudden movt.
				No supporting of body weight with hand
				Keep incision dry and clean
	DAY 1-6:			Sling for 6 weeks
		Sling or slight abduction brace 6 wee	eks	-
		Pendulum Exercises		
		PROM		
		Flexion 0-90 per tolerance		
		ER in scapular plane to 35 per	tolerance	
		IR in scapular plan to 35 per to	lerance	
		Table glides		
		Elbow/Hand gripping and ROM exer	cises	
		Cryotherapy (15-20 min every hour)		
		E-stim as needed for pain		
		Sleep in sling or brace		
	DAY 7 -10	):		
		Continue above exercises		
		PROM		
		Flexion 0-105		
		ER in scapular plane to 35-45		
		IR in scapular plane to 35-45		
		Continue modalities as needed		
		May begin weaning out of sling and	oillow at day 10	-14, as needed to sleep

PHASE II: PROTECTION PHASE DAY 11 - WEEK 6					
GOALS:	Allow healing of soft tissue	PRECAUTIONS:	No lifting		
	Do not overstress healing tissue		No excessive behind the back movt		
	Gradually restore full PROM		No supporting of body weight with hand		
	Decrease pain and inflammation		No sudden motions		

Continue above exercises PROM Flex 0-125-145 ER to 45 at 90 degrees abd IR to 45 at 90 degrees abd Continue modalities as needed Continue above precautions

## Day 15-28

Continue above exercises AAROM with wand Therapist assisted AAROM per patient tolerance Initiate prone rowing to neutral arm position Initiate submax isometrics in standing with elbow flexed Initiate Isotonic elbow flexion May use heat prior to exercise May use pool for light ROM exercises

## Day 29-42

Continue above exercises Initiate AROM Shoulder flexion in scapular plane Shoulder abduction \*patient must be able to elevate arm w/o shoulder or scapular hiking before continuing Initiate Isotonic strengthening ER tubing Side lying ER/IR Prone Rowing Prone Horz abduction Bicep Curls

#### PHASE III: INTERMEDIATE PHASE WEEK 7-14

GOALS: Full AROM week 10-12 Maintain full PROM Dynamic Shoulder stability Gradual restoration of shoulder strength and power Gradual return to functional activities Discontinue Sling 6 weeks after surgery

#### Week 7

Continue PROM/Stretching as needed Continue dynamic stabilization drills Progress strengthening ER/IR tubing ER sideling Lateral Raises Full can in scapular plane Prone rowing Prone Horz abduction Prone extension Elbow Flexion Elbow Extension

#### Week 8

Continue above exercises Initiate light functional activities when physician permits

## Week 14

Continue above exercises Progress to functional shoulder exercises

# PHASE IV: ADVANCED STRENGTHENING PHASE WEEK 15-22

GOALS:	Maintain full nonpainful ROM				
	Enhance functional use of the UE				
	Improve muscular strength and power				
	Gradual return to functional activities				
	Week 15				
	Continue ROM and stretching to maintain full ROM				
	Self capsular stretching				
	Progress shoulder strengthening to functional shoulder exercises				
	Initiate interval golf program if appropriate				
	Week 20				
	Continue above exercises				
	Progress golf program to playing golf if appropriate				
	Initiate interval tennis program if appropriate				
	May initiate swimming				
	PHASE V RETURN TO ACTIVITY PHASE WEEK 23 - 30				
GOALS:	Gradual return to strenuous work activities				
	Gradual return to recreational sport activities				
	Week 23				
	Continue above exercises				
	Progression to sport participation				

Week 26

May initiate interval sport program, i.e. golf, etc
